Daily Work Review

Day	Date / Task Description	Minutes Logged	Activity Highlights & Progress Notes	Completion Rate
Day 1	Task triage	420	Sorted and assigned the week's queue	80%
Day 2	Log analysis	380	Correlated events and flagged anomalies	90%
Day 3	User support	450	Resolved escalated user requests	85%
Day 4	Data entry	400	Assisted entry; review of AI tasks	75%
Day 5	Planning & review	410	Weekly wrap-up and next-week plan	95%

Detailed Activity Breakdown

AI Agent Activities

- Automated task creation and assignment.
- Log analysis and event correlation.
- System monitoring and anomaly detection.
- Assisted in data entry.

Human Agent Activities

- Complex task resolution requiring human judgment.
- Review and approval of AI-generated tasks.
- Direct user interaction and support.
- Strategic planning and oversight.

Summary

This past week, the AI agent has significantly contributed to the overall workload by automating task creation and handling a majority of system events. Human agents focused on resolving more complex issues, reviewing AI output, and supporting users directly.
